

EUCLID Tuf-Strand SF®

EUCLID CHEMICAL

EUCLID FIBER SPOTLIGHT Trench Shoring Yard Paving

When the Trench Shoring Company went looking for the most cost effective way to repave their N. Las Vegas yard, Stonescape Pavers responded. Within a budget originally based on asphalt, Stonescape was able to upgrade them to a longer lasting concrete pavement. Tuf-Strand SF® fibers increased the structural capacity of the paving over non-fiber concrete.

PROJECT DATA:

LOCATION: Las Vegas, NV

APPLICATION: Paving.

FIBER TYPE: Tuf Strand SF® @ 5.5 lbs./yd³

OWNER: Trench Shoring Company

CONCRETE CONTRACTOR: Stonescape Pavers

CONCRETE PRODUCER: Sierra Ready Mix

TOTAL AREA: 120,300 square feet.

- Increased flexural toughness, fatigue endurance and impact resistance.
- Non-corroding three-dimensional reinforcement
- Potential time and cost savings when used as an alternate to conventional reinforcement.
